**GENERAL NOTES:**

1. All dimensions are in meters unless otherwise stated.

2. All bearings are in degrees, minutes and seconds.

3. All elevations are in meters above sea level.

4. All distances are in meters unless otherwise stated.

5. All areas are in square meters unless otherwise stated.

6. All volumes are in cubic meters unless otherwise stated.

7. All weights are in kilograms unless otherwise stated.

8. All forces are in kilonewtons unless otherwise stated.

9. All stresses are in megapascals unless otherwise stated.

10. All moduli are in gigapascals unless otherwise stated.

11. All moments are in kilonewton-meters unless otherwise stated.

12. All deflections are in millimeters unless otherwise stated.

13. All displacements are in millimeters unless otherwise stated.

14. All rotations are in degrees unless otherwise stated.

15. All angles are in degrees, minutes and seconds unless otherwise stated.

16. All curves are defined by their radius, bearing and distance.

17. All circles are defined by their radius and center coordinates.

18. All spirals are defined by their start and end radii, bearing and distance.

19. All lines are defined by their bearing and distance.

20. All points are defined by their coordinates.

21. All areas are defined by their vertices.

22. All volumes are defined by their vertices.

23. All weights are defined by their mass.

24. All forces are defined by their magnitude and direction.

25. All stresses are defined by their magnitude and direction.

26. All moduli are defined by their magnitude and direction.

27. All moments are defined by their magnitude and direction.

28. All deflections are defined by their magnitude and direction.

29. All displacements are defined by their magnitude and direction.

30. All rotations are defined by their magnitude and direction.

31. All angles are defined by their magnitude and direction.

32. All curves are defined by their radius, bearing and distance.

33. All circles are defined by their radius and center coordinates.

34. All spirals are defined by their start and end radii, bearing and distance.

35. All lines are defined by their bearing and distance.

36. All points are defined by their coordinates.

37. All areas are defined by their vertices.

38. All volumes are defined by their vertices.

39. All weights are defined by their mass.

40. All forces are defined by their magnitude and direction.

41. All stresses are defined by their magnitude and direction.

42. All moduli are defined by their magnitude and direction.

43. All moments are defined by their magnitude and direction.

44. All deflections are defined by their magnitude and direction.

45. All displacements are defined by their magnitude and direction.

46. All rotations are defined by their magnitude and direction.

47. All angles are defined by their magnitude and direction.

48. All curves are defined by their radius, bearing and distance.

49. All circles are defined by their radius and center coordinates.

50. All spirals are defined by their start and end radii, bearing and distance.
