REQUEST FOR PROPOSALS

DEVELOPMENT AND IMPLEMENTATION OF A SPATIAL TRANSFORMATION IMPACT MOBILE APPLICATION

HDA/JHB/2019/020

PROPOSALS TO BE SUBMITTED BY NOT LATER THAN
11H00 ON 10 MARCH 2020

1. Introduction

The Housing Development Agency (HDA) is a national public development agency which promotes sustainable communities by making well located and appropriately planned land available for the development of human settlement. As its primary activity, the HDA assembles state, private and communal land and releases it for development. In addition HDA provides project delivery support services to organs of state at local, provincial and national level. The key objective of the Monitoring and Evaluation, Knowledge Management and Research Planning Unit is (according to the HDA Act, 2008), 'to monitor the provision of all infrastructure required for housing development'. Central to achieving this objective is to monitor the impact of spatial transformation as per the National Development Plan.

2. Background

One of the priorities of the Medium-Term Strategic Framework (MTSF) 2019 -2024 is to ensure the achievement of spatial transformation through multi-programme integration in 94 priority development areas. In view of achieving this target, the Monitoring & Evaluation, Knowledge Management and Research Planning Unit seeks to establish a digital capability to evaluate spatial transformation via a Spatial Transformation Impact Mobile Application (STIA). The STIA will be initially piloted in selected integrated and inclusive communities. The objectives of the STIA are

- a) To have an interactive engagement with the beneficiaries of housing developments and gauge the pulse of the community.
- b) To improve the citizen experience and facilitate two-way communication between citizens and the human settlements sector

The HDA is seeking the services of a consultancy team with proven website and mobile application development experience to design, develop, implement and provide long-term maintenance of a mobile application for citizen engagement. The team will work under the supervision of the Senior Manager: Monitoring & Evaluation, Knowledge Management and Research Planning. The Senior Manager will be seen as the product owner.

3. Scope of work

The main duties and responsibilities of the service provider are:

- 3.1. Assist in documenting hardware and software requirements (HDA to supply the required Hardware)
- 3.2. Develop and implement a commercially stable, dynamically scalable mobile capturing application
 - 3.2.1. Development methodology
 - 3.2.1.1. Development of the software must follow an agile methodology with frequent feedback given to the stakeholders
 - 3.2.1.2. The agile methodology must support a phased development approach, where the success of a phase will determine the appetite and feasibility for further phases that will add further features and capabilities to the mobile application. Budget will be allocated per phase with a defined backlog as set and negotiated between the project team and the product owner. A phase is not synonymous to a sprint: a phase will be comprised of multiple sprints.
 - 3.2.1.3. Continuous feedback with the product owner must be implemented via ceremonies such as sprint reviews, demos and retrospectives.

3.2.2. Architecture

- 3.2.2.1. The architecture of the application must be based on a two-tier architecture, where presentation logic is in the mobile application, and the business logic is contained in a backend server on the cloud. The backend functionality may also be implemented using serverless cloud technology.
- 3.2.2.2. Cloud-hosted services will need to be deployed in a cloud account owned by the HDA. This includes both pre-production and production workloads. The service provider may use their own cloud account for their own development purposes, but that will be at the service provider's expense.
- 3.2.2.3. For the purposes of quality (QA) testing and production, the HDA cloud account will need to be used

3.2.3. Front end GUI Requirements

3.2.3.1. Security

Fully secured and access-controlled to authorised users (HDA controlled and managed)

- Registration of users must not be open-ended: user's details will need to be checked against a database of beneficiaries, or follow a manual authorisation process actioned by a support team
- Data must be protected and encrypted
- Data access control must consider who can edit and see captured data and reports
- The lifecycle and management of data stored needs to take POPI Act into account
- 3.2.3.2. User profile functionality Provision of specific functionality based on the signed in users' roles and responsibilities
- 3.2.3.3. Multiple Platform support –Mobile/Tablet device support i.e. compatible with iOS and Android. It should be ensured that the mobile application works flawlessly across different platforms and touch screen devices (Windows and IOS)
- 3.2.3.4. Core Features
 - Data Entry of the STIA (see Annexure A)
 - Geocoding using device's location-based services (e.g. GPS)
 - Receiving push notifications for targeted communication
- 3.2.3.5. Design of the mobile application GUI must be user tested through the use of a mobile prototyping framework
- 3.2.3.6. A mobile prototyping framework needs to be used to provide quick prototype iterations for the product owner to be able to provide quick feedback and direction to the project team
- 3.2.3.7. Design, look and feel
 - The mobile application will provide clear layout and organized displays
 - Develop Resolution independent design structure: It must be ensured that the mobile application adjusts itself automatically as per the screen resolution of the Mobile i.e. 1024*768, 1200*800 etc.
 Resolution independent mobile application will automatically expand/compress itself as per the screen resolution and hence there should not be any vertical scroll in the mobile application structure
 - The mobile application should open and function properly with low bandwidth
 - The mobile application should be able to operate with limited functionality in an offline mode
 - The mobile application should support multi-lingual functionality

- The mobile application needs to alert the user to download the latest version, which ever available and if required prompt for compulsory upgrade.
- The mobile application should be capable of accessing mobile device features like camera, GPS, etc.

3.2.3.8. Usability

- The mobile application will provide consistent experience across all mobile platforms
- The mobile application must be easy and intuitive to learn

3.3. Data processing and analysis

The mobile application should be able to process results and draw out analysis with corresponding bar charts, graphs, pie charts etc. clearly depicting the transformation % for Quality of Life, Quality of Place and Quality of Growth per community. This function is only available to selected users that will be given a role of "report read-only access". The registration of these selected users to access the mobile application will not follow the same process as for beneficiaries and may need to be administered by the product owner.

3.4. Generate reports

- Data captured can be exported and sent as reports
- Reports should include maps, tables, graphs etc.
- Save and export to pdf functionality whilst retaining all graphic elements and design layouts
- All data to be exported to a spreadsheet / database (data must be usable for pivot tables)

3.5. Cloud Storage

- Data captured must eventually be synchronised to Cloud storage so that it may then be used for backend processing
- Data retention policies will require a backup solution to on-premise hardware
- The design of the data storage needs to take into account the POPI Act, with specific attention given to what data can be stored outside South African borders, and how to achieve the functional requirements whilst still remaining within the conditions laid out in the POPI Act.

3.6. Training

- Develop a user manual for the users that will be administering access to the mobile application and for the users who will be given the 'report read-only access' role.
- Provide at least two training sessions to selected HDA personnel
- Provide cloud administration handover sessions and documentation for HDA staff to be able to effect system operation functions.
- Training costs should be provided per user.

3.7. Maintenance

 Maintain the mobile application for at least 12 months from the time it goes LIVE

4. Deliverables

- 4.1. Project plan approach should include budget plan as well as a risk and mitigation plan
- 4.2. Business and technical architecture documented using UML and depicting:
 - Class diagrams with relationships between classes
 - Sequence diagrams for all component interactions
- 4.3. User requirements specifications
- 4.4. Functional requirements specifications which must include a prototype of the mobile application depicting all UX elements
- 4.5. Testing and Acceptance procedure to agreed specifications with the client (including stress and penetration testing). The testing will be conducted in/with a community. The Service provider is to provide mobile devices for testing.
- 4.6. Demonstration of mobile application LIVE
- 4.7. Training Manual
- 4.8. Software development code, commented code, all APIs, classes, processes and procedures
- 4.9. Report on the implementation of mobile application
- 4.10. Monthly maintenance reports
- 4.11. Bi-weekly project status meetings and a monthly progress status report will be expected during the development period

5. Time Frame

A maximum of ten months is envisaged for delivering a fully functional Mobile application as described in the body of the report and as per deliverables.

6. Acceptable Practices

- The service provider will provide a project champion to minimize communication confusion and maximize effectiveness.
- The service provider will preserve the confidential information obtained and will not use the information for personal and commercial gain nor in a way that would be harmful to the HDA.
- The Service Provider must demonstrate a high degree of flexibility and must have the ability to tailor content and delivery methods to meet the specific needs of the HDA.
- The service provider must provide the HDA with a one-year warranty period, starting when
 the mobile application is accepted/ approved by the HDA. The service provider will
 warrant all work to be free of defects during the 12 months maintenance period. Any
 repairs or "bug fixes" required during this period will be made at no expense to the HDA
 by the service provider.

7. Intellectual Property Right

The entire source code developed as part of the scope of RFP is to be provided to the HDA with proper documentation describing the source code of each module/routine etc. All deliverables in the form of software, source code, documentation and other items related with the tool developed will become the sole intellectual Proprietary item of the HDA. The design, development and implementation of the scope of the work under the RFP are the sole property of the HDA.

Note:

- 1. During the development phase the Mobile application need to be registered in the name of the HDA.
- The HDA will provide all hardware requirements to host the Mobile Application at the HDA's cost.

8. Evaluation

In order to facilitate a transparent selection process that allows equal opportunity to all production companies, the HDA has a policy for the appointment of consultants that will be adhered to. Proposals will be evaluated in terms of the prevailing supply chain policy applicable to the HDA and it should be noted that proposals will be assessed using the 80: 20 formula for Price and BEE as per the PPPFA.

- 8.1. The HDA needs to be satisfied, in all respects, that the organisation/individual selected has the necessary resources, qualifications and abilities for this project, and that all submissions are regarded in a fair manner in terms of evaluation criteria and process.
- 8.2. The assessment and evaluation of submitted proposals will undergo a process of Pre-qualification and an Evaluation Phase. The initial phase of the evaluation will be in a form of a Pre-qualification, in accordance with the PPPFA Act, Preferential Procurement Regulation which organs of state can apply in order to advance designated groups and transformation. Only tenderers who meet the Pre-qualification conditions will be considered for the next phase. i.e. Evaluation Phase. A tender that fails to meet any Pre-qualifying criteria stipulated in the tender document is an unacceptable tender. Pre-qualification conditions which an applicant must meet in order to be considered:
 - A tenderer having a stipulated minimum of level 1 to 3 B-BBEE status level.
- 8.3. The general methodology of selection will be based on proposals that will first be evaluated on their technical ability to perform the task. Any proposals scoring below 75 points noted in the table below will be disqualified for the second evaluation. The second evaluation of technically competent proposals will be evaluated against Price and B-BBEE using an 80/20 Price/B-BBEE formula.

9. General

9.1. Below are compulsory requirements for this service

Note: Failure to comply with the following requirement will automatically disqualifies the bidder.

- 9.1.1. It is important to note that the successful bidder will work under the supervision of an HDA representative, abide by HDA's Code of Conduct, and other organisational guidelines.
- 9.1.2. Kindly complete and submit the HDA Supplier Registration form if not already on our database and submit together with:
 - CSD registration report (Registration with the National Treasury Central Supplier Database, if not yet registered use the following link to register: https://secure.csd.gov.za.
 - SBD Forms (SBD4, SBD6.1, SBD8 and SBD9) obtainable from HDA
 Website: www.thehda.co.za/procurement. Under compliance checklist.
 - Valid and Original or Certified B-BBEE Status Level Verification Certificates issued by the following agencies SANAS, IRBA or CCA.
 - Price proposals on all work to be done.
- 9.2. Further information regarding technical matters can be sent Ms. Karishma Busgeeth via email to: Karishma.Busgeeth@thehda.co.za or at tel: 011 544 1000, and
- 9.3. Further information regarding supply chain matters and queries can be sent to Mr. Mxolisi Zondo via email to: Mxolisi.Zondo@thehda.co.za or at tel: 011 544 1000

10. Terms and Conditions

- 10.1. HDA undertakes to pay in full within thirty (30) days, all valid claims for work done to its satisfaction upon presentation of a substantiated claim/invoice.
- 10.2. No payment will be made where there is an outstanding information/work by the service provider/s.

11. Submission of Proposal

Proposal should be submitted clearly marked "THE APPOINTMENT OF A SERVICE PROVIDER FOR THE DEVELOPMENT AND IMPLEMENTATION OF A SPATIAL TRANSFORMATION IMPACT APP ON A MOBILE PLATFORM" and deposited in a tender box on or before the 10 MARCH 2020, not later than 11h00 to the following address:

The Procurement Officer

The Housing Development Agency,

Block A, 6-10 Riviera Road, Killarney, 2193,

Tel: 011 544 1000

The selection of the qualifying proposal will be at the HDA's sole discretion. The HDA does not bind itself to accept any particular bid/proposal, and the HDA reserves the right not to appoint the consultant.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1. This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging)² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and/or services for purchasers who wish to acquire goods and/or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

I, the undersigned, in submitting the accompanying bid:					
	(Bid Number and Description)				
in re	in response to the invitation for the bid made by:				
	(Name of Institution)				
do h	ereby make the following statements that I certify to be true and complete in every ect:				
I cert	tify, on behalf of that:				
	(Name of Bidder)				
1.	I have read and I understand the contents of this Certificate;				
2.	I understand that the accompanying bid will be disqualified if this Certificate is found not to be true and complete in every respect;				
3.	I am authorized by the bidder to sign this Certificate, and to submit the accompanying bid, on behalf of the bidder;				
4.	Each person whose signature appears on the accompanying bid has been authorized by the bidder to determine the terms of, and to sign the bid, on behalf of the bidder;				
5.	For the purposes of this Certificate and the accompanying bid, I understand that the word "competitor" shall include any individual or organization, other than the bidder, whether or not affiliated with the bidder, who:				
	 (a) has been requested to submit a bid in response to this bid invitation; (b) could potentially submit a bid in response to this bid invitation, based on their qualifications, abilities or experience; and (c) provides the same goods and services as the bidder and/or is in the same line of business as the bidder 				
6.	The bidder has arrived at the accompanying bid independently from, and without consultation, communication, agreement or arrangement with any competitor. However communication between partners in a joint venture or consortium ³ will not				

be construed as collusive bidding.

³ Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

- 7. In particular, without limiting the generality of paragraphs 6 above, there has been no consultation, communication, agreement or arrangement with any competitor regarding:
 - (a) prices;
 - (b) geographical area where product or service will be rendered (market allocation):
 - (c) methods, factors or formulas used to calculate prices;
 - (d) the intention or decision to submit or not to submit, a bid;
 - (e) the submission of a bid which does not meet the specifications and conditions of the bid; or
 - (f) bidding with the intention not to win the bid.
- 8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.
- 9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
- 10. I am aware that, in addition and without prejudice to any other remedy provided to combat any restrictive practices related to bids and contracts, bids that are suspicious will be reported to the Competition Commission for investigation and possible imposition of administrative penalties in terms of section 59 of the Competition Act No. 89 of 1998 and or may be reported to the National Prosecuting Authority (NPA) for criminal investigation and or may be restricted from conducting business with the public sector for a period not exceeding ten (10) years in terms of the Prevention and Combating of Corrupt Activities Act No. 12 of 2004 or any other applicable legislation.
