## **1. Introduction and Background**

The Housing Development Agency (HDA) is a national public development agency that promotes sustainable communities by making well-located land and buildings available for the development of human settlements. As its primary activity, the HDA assembles state, private and communal land and buildings and releases it for development. In addition the HDA provides project delivery support services to organs of state at local, provincial and national level.

As part of its legislative mandate, Section 7 of the Housing Development Agency Act, (Act No. 23 of 2008) requires the Agency to, amongst others, undertake any processes relating to approvals required for housing development, prepare necessary documentation for consideration and approval by the relevant authorities, monitor progress of the development of immovable property acquired for the purposes of creating sustainable human settlements.

The HDA has been appointed by the National Department of Human Settlements to assist with the Human Settlements component of the National Mining Towns Intervention. The objectives of the human settlements component of the intervention require the transformation of the mining towns through the creation of sustainable integrated human settlements.

The intervention requires the following broad thrusts:

- fast-tracking and supporting existing human settlement projects in the mining towns areas;
- identification of suitable areas of further areas of investment taking into account the human settlement conditions in the identified mining town;
- Identification of partners for implementation

The human settlement planning and project pipeline development work however needs to shift towards spatial transformation planning going forward to ensure the necessary impact and transformation in the mining towns and ensuring the creation of integrated sustainable human settlements.

The spatial transformation plans need to be informed by existing planning work, research, and available information. In addition to this, the HDA has the following distinct but complementary programmes that are part of the mining towns and transformation work:

- Informal Settlement Upgrading Programme (ISUP)
- Catalytic Projects Programme (CPP)
- Land identification and land assembly

## 2. Objectives of the Project

- The objective of the project/ the Spatial Transformation Plan is to develop a clear business plan and implementation plan for the mining towns (within Mogalakwena Local Municipality) which will incorporate a work stream within and beyond the current MTSF cycle. The outcome of this plan should provide a credible platform through which the mining towns budget/funding can be streamlined and focused on specific outcomes in and around the mining towns' areas within this region.
- The purpose of the Spatial Transformation Plan is to look at housing, but not in isolation, so as to ensure sustainable long term development in the mining towns, especially post mining activities.

## 3. Scope of Works

- Articulation of the vision and plan for Mogalakwena Local Municipality within the current and possible future dynamics of a declining or developing mining town(s) (State of mining town)
- Assessment and articulation of mining within Mogalakwena Local Municipality and its impact within the broader region;
- Identification of the specific nodes in Mogalakwena (Study area), including the identification of the specific mining houses within the municipality
- The State of the existing mining in the municipality – examining the conditions of the identified towns (i.e. are they in decline/growth mode and determine the post mining scenarios etc.);
- Identify the mining companies in the area and analyse their mining activities with specific reference to the remaining lifespan of their mining operations
- Articulation of the sustainable approach to human settlements by both government and private sector to address the human settlement conditions in the region;
- The spatial elements and dimensions of the identified mining towns;
- Identification of existing plans / strategies within the mining town area (or the lack thereof – and identifying plans that are required)
- Creation of a tool / method through which these areas can be classified to require dedicated attention through mining towns funding (i.e. hierarchy and scales);
- Identification of specific areas, within the mining towns, that require intervention (providing a detailed description for the choice of intervention areas and their hierarchy)
- Framework for engagement and joint planning between the government and private sector interventions;
- The project pipeline and implementation plans, for these identified intervention areas, taking into account the government's priorities in terms of the MTSF cycles i.e. informal settlement upgrade;
- Projection of budget and budget inputs over the medium term including budgets for the infrastructure needs;

- Programmed plan and implementation framework over the proposed trajectory
- Adoption of the plan by the municipality and inclusion of the projects into the municipal IDP (Council Resolution).
- Analysis of legacy assets and their impact on H/S municipal planning and operational capacity.
- The identification of land owned by the mining companies, the use (existing) and future plans for the land

The plan should compile a true Spatial Transformation Plan for this area and ensure the project planning and implementation phase of this work is completed and re-aligned back into the mining towns framework.

- Clear definition of projects as delivery tools for the mining towns programme (example, ISU)
- Clear interpretation of space in terms of vital locations where the projects are located or to be located (i.e. Land pipeline);
- Clear definition of credible partners / existing role players / interested parties that can play a significant role in mining towns (state and private sector-mining companies/role players); and
- A clearly defined business plan and implementation plan drawing from the MTSF Mining Towns funding trajectory and private sector contribution;

The individual Municipal and Provincial Plans including but not limited to Integrated Development Plans, Urban Development Plans, Growth and Development Strategies and Plans must be taken into consideration when carrying out this assignment.

**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

1. This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
