1. INTRODUCTION & BACKGROUND

The Housing Development Agency (HDA) is a national public development agency established by an Act of Parliament (Act 23 or 2008). The HDA promotes sustainable communities by making well-located land and buildings available for the development of housing and human settlements. As an organ of state, the HDA is accountable through its board to the Minister of Human Settlements. Visit [www.thehda.co.za](http://www.thehda.co.za) for more information.

As part of the Housing Development Agency’s (HDA) legislative mandate to develop sustainable human settlements, the Housing Development Agency together with Umuziwabantu Local Municipality have entered into a partnership to develop a new project in the area of Harding.

This project is part of the municipality’s strategic objectives of regenerating the town of Harding and bringing in new housing opportunities in the area for affordable and middle-income housing. The subject area was previously subdivided into 82 residential erven with an average site size of 1000m².

The current layout supports much lower densities which do not align with the Municipality’s own densification framework. There is a growing demand for residential accommodation in the municipality for the GAP and affordable housing market segment. To meet this demand, a new concept would have to look at increased densities in order to maximise the development potential of the site and also to meet the demand for new developments.

The HDA undertook the exercise of doing a conceptual re-layout which looked at a different housing mix and typologies. Total yield is 264 residential erven average site size being 400m² plus 3 super blocks reserved for medium density housing for the GAP and/or Social Housing market. The extent of the study area is 40,4286ha.

The Development Concept sought to address the following key areas:

- Increased densities
- mixed income and housing types
- accessible range of services and facilities
- integrated with surroundings
- integrated land use

2. AREA DESCRIPTION
The Umuziwabantu Municipality is located on the western boundary of the Ugu District Municipality and shares its borders with the Easter Cape; Sisonke District and to the east with the Umzumbe and Ezinqoleni Municipalities. The extent of the Umuziwabantu Municipal area is 10 862 ha (1088 km²). This area is constituted as follows:

- Urban: Harding which is about 2% of the area
- Farmland: This constitutes 36%
- Forestation: 20%
- Tribal Areas: approximately 42%

Economic activity in the town is mainly agricultural and government services. There is a significant gap in the housing supply and demand in the area. This has resulted in largely backyard rentals in the town due to the lack of adequate housing for the rental market. Further to this, there is no new housing stock catering for the market that earns above the BNG subsidy quantum. This presents a great opportunity for this site given its location on the edge of the main town and along a fully developed local road network. The area is strategically located also along the N2 which is the main feeder between KZN and Eastern Cape.
Diagram 1 below, indicates the site locality

3. OBJECTIVE OF THE PROJECT

The objectives of the project are two-fold. Firstly, to address the Municipal housing needs and secondly to provide a single development where all income categories are catered for; an integrated development that provides for a range of housing options such as CRU/Social housing serviced sites and bonded housing.

The municipality aims to create a sustainable community in implementing this project, by creating a neighborhood that is built on green living, alternative technology in terms of electricity, water harvesting or any other such methods or technologies that would help in achieving the country’s targets in the reduction of carbon emissions. The sustainability ethos for this development is underpinned in the main by the principles as outlined below:

- Low Carbon
- Climate Resilient Built Environment
- Communities And Human Settlements Flagship Programme

Town Planner

A Town Planner will be required as part of the professional team to undertake detailed feasibility studies for each of the project areas. The role of the planner will vary depending on the statutory process required for securing development rights, with the primary focus being on land use and statutory planning processes.

Scope of Work

Town Planner forms part of the team assembled to undertake the detailed planning as part and in the preparation of a development framework to guide investment and implementation. The Town Planner should be able to provide strategic leadership within the team and could also act as the lead consultant and/or project manager.

The key responsibilities that may be undertaken by the planner include:

- Overall management and co-ordination of work-streams
- Driving necessary engagements with technical departments and stakeholder
- Ensuring the project is executed efficiently according to a programme
- The coordination and packaging of all inputs required in the preparation of a Development Framework, Precinct Plan, and Urban Design Framework as may be required
• Undertaking a planning assessment, being a technical assessment of the site, and assessment of the current strategic framework giving direction to land use and development objectives for the site
• Land Use Planning, involving identifying — in conjunction with any market assessments conducted — the ideal distribution of land use activity across the site, both horizontally and vertically
• Statutory Planning, involving identifying appropriate zoning and other statutory tools required to secure a land use management system for the site. This may include the preparation of a Special Zone or Precinct Plan with supplementary controls for managing land use and development across the site
• Layout Planning, involving the preparation of a layout for the site. The layout of the site must be founded on sound development principles, goals and objectives developed for the site and in response to the specific needs for mixed use and social housing.
• The town planner will be responsible for the urban design development should they be able to demonstrate good competence and experience in this. In this case the town planner must ensure strong integration between the building envelope, the space between buildings — in particular public space and circulation — and responsiveness to existing development on the edges of the site.

Land Surveyor

A land surveyor will compile the property and topographic data, which will provide the base plan information to be employed by the architects, urban designers and planners in the preparation of preliminary layouts and site development plans. The land surveyor may also have the expertise to undertake a land audit where this may be required. The opinion of a conveyancer may be sought; if on inspection of the Title Deeds, certain encumbrances and conditions restricting the potential development of the site are encountered.

Scope of Work
The land surveyor will attend to the following tasks:

Land Audit
• Confirm the property extent, by locating SG Diagrams, including diagrams of servitude, and obtain the property Title Deeds or original Deeds of Grant from the Deeds Registry
• Preparation of Land Surveyor Certificate detailing all servitudes affecting the property.

HDA/KZN/2019/002
Topographical Survey

- All boundary features such as boundary fences and walls
- All engineering services and infrastructure, such as pipelines, underground cables
  manhole covers, valves, pump stations, distribution boxes, substations etc
- Routes of underground pipe lines, cables, and other buried services, which positions
  must be determined from surface and sub-surface indications
- Routes of overhead cables and location of support pylons
- Road edges, kerbs, and stormwater catchments and inlets
- Street furniture, light poles, telephone poles and other above ground installations
- The position of all mature trees on site as directed by the environmentalist
- A buffer area of 5 to 10m from the site boundary where practically feasible
- All registered servitudes impacting on the site.

Consolidation and Subdivision
The land surveyor will prepare draft diagrams for consolidation and subdivision as part of the
detailed feasibility and planning process.

Conveyancing
Conveyancing services will be required to undertake the registration of all newly created
erven in Deeds Office.

Environmentalist
The services of Environmental Specialists will be required for specialist studies, Screening,
Basic assessment and EIA processes.

Scope of work:
Environmental Screening
- A botanical assessment is required to determine if the site contains any protected
  plant species;
- Protected species must be identified and mapped;

HDA/KZN/2019/002
- The screening must establish if the proposed development triggers the need for an EIA processes in terms of NEMA, 1998 and its attendant Regulations, 2014;
- Further the screening will identify if there is a need for permit applications for the removal of any identified red data species;
- The specialists reporting must provide strategic recommendations for:
- Any mitigation measures required to reduce impact of development on the site.
- Potential environmental offsets required to address the loss of biodiversity and environmental and ecological services.

**EIA or BA Process**
- The processes for an EIA or BA process, and the roles and responsibilities of the Environmental Practitioner are well established. As an outline the following activities will be required:

  - Facilitation of public participation processes
  - Preparation of background document of public participation and registration of interested and affected parties
  - Preparation of notices and advertisements of EIA for public comments
  - Circulation of BAR to relevant departments and institutions for comments
  - Addressing and responding to comments from interested and affected parties
  - Attending all meetings related to the BA process
  - Follow up on responses from the relevant competent authority.

**Civil and Electrical Engineering**
The services of both a Civil and Electrical Engineer will be required to undertake a full feasibility for each of the sites.

**Scope of Work**
The scope of work for a Civil Engineer includes:
- Provisional status quo (existing) condition assessment of the civil engineering service
- Preparation and submission of civil engineering report detailing the following requirements amongst others:

HDA/KZN/2019/002
• Preliminary calculations for the wet services infrastructure requirements for the proposed development, with particular reference to water demand (including fire water demand), sewerage collection/discharge and stormwater collection/disposal
• Providing recommendations on the provision of civil engineering services to the proposed development
• Preliminary cost calculations for the provision of planned on-site wet services infrastructure required
• Obtain formal confirmation from the applicable municipality about its ability to develop and deliver engineering infrastructure services.
• Further ascertain estimates for bulk services contribution costs and timelines for the provision of bulk civil engineering services (water, sanitation and electrical)
• Proposed engineering services layout e.g. proposed positions of plant, retention and dams and ponds (if any required)
• Calculation and certification of the 1:100-year flood line. A separate report will be required for the flood-line calculation
• Attend all project meetings as and when required.

The scope of work for an Electrical Engineering includes:
• To conduct detail feasibility analysis of the location and availability of existing electrical services;
• To prepare and design the electrical reticulation system to be incorporated into proposed amended township layout;
• To prepare a submission and solicit comments from the relevant authorities regarding the electricity infrastructure (inclusive of relevant way leave applications);
• To ensure that electrical servitudes are captured correctly on the layout plans
• To ensure approval of designs
• To prepare detailed costing analysis of the proposed reticulation infrastructure and
• To prepare proposals for the alternative green or renewable technology that would feasible for this project.
Kindly submit CV's, professional registration and certified copies of qualification of the proposed team for this project.

10. FEE STRUCTURE

10.1 An all-inclusive (lump sum) cost (including disbursements and VAT @ 15%) must be submitted for the entire project.

10.2 A comprehensive fee structure, time frame and payment schedule should be included in the submission (this will be discussed, agreed upon and included in the contract).

11. EVALUATION PROCESS

11.1 In order to facilitate a transparent selection process that allows equal opportunity to all services providers, the HDA will adhere to its policy on the appointment of services providers.

11.2 The assessment and evaluation of submitted proposals will undergo a process of Pre-qualification and an Evaluation Phase. The initial phase of the evaluation will be in a form of a Pre-qualification, in accordance with the PPPFA Act, Preferential Procurement Regulation which organs of state can apply in order to advance designated groups and transformation. Only tenderers who meet the Pre-qualification conditions will be considered for the next phase, i.e. Evaluation Phase. A tender that fails to meet any Pre-qualifying criteria stipulated in the tender document is an unacceptable tender.

Pre-qualification conditions which an applicant must meet in order to be considered:

- A tenderer having a stipulated minimum of level 1 to 3 B-BBEE status level.

11.3 The HDA needs to be satisfied, in all respects, that the organisation/individual selected has the necessary resources, qualifications and abilities for this project, and that all submissions are regarded in a fair manner in terms of evaluation criteria and process.

The following functionality criteria will be used for evaluating the tender.

a. The benchmark of minimum 70 points out of 100 points on technical functionality will be the cut off to qualify for further evaluation.

b. Those that qualify will be assessed using the 80:20 formula for Price and B-BBEE as per the PPPFA.

CERTIFICATE OF INDEPENDENT BID DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
