- (5) A tenderer may not be awarded points for B-BBEE status level of contributor if the tender documents indicate that the tenderer intends subcontracting more than 25% of the value of the contract to any other person not qualifying for at least the points that the tenderer qualifies for, unless the intended subcontractor is an EME that has the capability to execute the subcontract.
- (6) The points scored by a tenderer for B-BBEE in terms of sub-regulation (2) must be added to the points scored for price under sub-regulation (1).
- (7) The points scored must be rounded off to the nearest two decimal places.
- (8) Subject to sub-regulation (9) and regulation 11, the contract must be awarded to the tenderer scoring the highest points.

(9) (a) If the price offered by a tenderer scoring the highest points is not market related, the organ of state may not award the contract to that tenderer.

(b) The organs of state may

(ii) if the tenderer does not agree to a market-related price, negotiate a market-related price with the tenderer scoring the second highest points or cancel the tender;

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging)<sup>2</sup>. Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

Bid rigging is, therefore, an agreement between competitors not to compete.

**C3 SCOPE OF WORK**

The Free State Department of Human Settlements appointed the HDA Free State as the Implementing Agent for the proposed Township Establishment in Sasolburg. This development, which is located within Metsimaholo Municipality's area of jurisdiction, is one of the Catalytic Projects identified by the Free State and National Departments of Human Settlements.

The study area is Metsimaholo Local Municipality. Metsimaholo Local Municipality is located in the Fezile Dabi District in the Northern Free State. The geographical area of the municipality is 1 717.07 square kilometers. Metsimaholo means "big water" in Sesotho, due to the abundance of this resource in the area. It was formerly known as the Sasolburg Municipality. The three major towns that form part of Metsimaholo are Sasolburg (the municipal head office), Oranjeville, and Deneysville.

Sasolburg is a large industrial town within the Metsimaholo Local Municipality. It is further subdivided into three areas:

- Vaalpark (a more affluent cluster of suburbs located about 5 km north of the Sasolburg CBD), and;
- Zamdela Township.

- Gathering first-hand data, to the extent possible, on WSS unit information that is or adequately reported on sewerage access, provision of dislodging and treatment, water supply access etc.
- Based on the data gathered, conducting a demand-supply analysis, identifying areas with the most need for water supply and sanitation services and conducting ground survey activities for primary data gathering and validation of existing data.
- Identification of major infrastructure assets such as reservoirs, waste water treatment plants, pump stations, water quality monitoring and waste disposal.
- Gathering of the updated relevant data from Rand Water Board on bulk water supply to Metsimaholo Local Municipality.

  - Alternative options, including the associated costs, benefits and risks involved, in delivering projects and selecting the best possible implementation configuration involved.
- Prepare comprehensive and detailed maps of existing WSS facilities, assets and investment/intervention areas including possible water sources for water sources for supply and project sites.
- Establish & document information from town planning and housing units, which areas will be developed for housing back logs, i.e. areas of high water demand growth rate and possible sanitation usage and provides solutions.
- Evaluate present reticulation reservoir zones and sewer stations against long term town and regional planning, taking into account non-development area such as steep slopes and defined zones.
- Determine ultimate and revised, if necessary supply zone boundaries for present reservoirs.
- Identify areas where storage will be required up to 2029 and determine future reservoir locations and supply zone boundaries, while optimizing the present storage capacities.
