1. INTRODUCTION

The Housing Development Agency (HDA) is a national public development agency which promotes sustainable communities by making well located and appropriately planned land available for the development of human settlements. As its primary activity, the HDA identifies, acquires, holds, develops, and releases state, private and communal land for human settlements. As part of its processes, the HDA conducts property holding plans in order to identify and implement services and maintenance requirements to ensure the sustainability, security, and prevention of invasions on the properties in possession.

2. BACKGROUND INFORMATION

A pre-feasibility report undertaken on the subject property suggests that a dolomite stability investigation must be undertaken prior to acquisition of the property. The National Department of Public Works and Infrastructure (DPW&I) signed a Special Power of Attorney allowing The Housing Development Agency (HDA) to undertake all the necessary care relating to the property before an outright release is granted hence this submission.

The Ga-Segonyana Local Municipality is experiencing an influx of immigration due to the employment and other opportunities and this has resulted in a rise in informality in this area. The municipality together with provincial government and the HDA have identified properties that may, if conditions permit, be developed for human settlements purposes to curb the problem. However, Kuruman is located (some parts) in an area that is prone to do-line formations and sinkholes and this phenomenon necessitates a geotechnical study in order to assess suitability prior to any development taking place on the property. There is an existing Special Power of Attorney (SPOA) signed by DPW&I granting the HDA permission to undertake the necessary pre studies and investigations on the property.

PICTORIALS

The property is located in Northern Cape Province, in the jurisdiction of Ga-Segonyana Local Municipality on the western boundary of Kuruman town (-

27.460298, 23.416192). The demarcated area (see aerial photograph below) is known as Erf 1981 Kuruman. The erf is currently zoned as “Agriculture” and is estimated to measure $\pm 125,425$ Ha in extent.

Locality Map

3. OBJECTIVE

The desired outcome of the project is to determine the geotechnical feasibility and suitability of Erf: 1981 Kuruman in GaSegonyana Local Municipality through Dolomitic Stability Study (phase 1). The property is adjacent to Kuruman CBD. The future development viability of the property for human settlements purposes is dependent upon the conclusion of detailed feasibility studies. The HDA and the municipality identified the property and DWP&I resolved to release the property for human settlements project and that a possible solution would be to formalize the area through a township establishment process, a conclusion was reached to conduct a Dolomite Stability Study prior. In the main, there are no other mechanisms in place to address the problem. However, the primary solution is to undertake a stability investigation. The outcomes of the investigations are going to provide for the development potential i.e.

either the land may or may not be utilised for human settlements purposes. The existing secondary data remains insufficient to arrive at a plausible conclusion.

4. SCOPE OF WORK AND AREAS OF FOCUS

HDA intends to utilize services of a relevantly qualified and experienced professional service provider to undertake Dolomite Stability Study (phase 1) which is a prerequisite for the acquisition of the property known as Erf 1981 Kuruman in the GaSegonyana Local Municipality.

- Gravity surveys to establish position for geotechnical drilling positions. The geophysical survey should include a gravity survey undertaken by a competent geophysicist.
- Drilling of boreholes using air percussion will be drilled to a minimum of 6 m into hard rock or 60 m whichever comes first as per SANS 1936-2. And the number should be as per SANS requirements.
- The study area should have classified based Inherent Hazard Risk Classification (IHC) based on a dewatering and non-dewatering scenario.
- Dolomitic zonation map should be created for the study area based in gravity survey results as well as percussion drilling results.

4.1 EXTENT AND COVERAGE OF THE PROPOSED PROJECT

The property is situated in Ga-Segonyana LM known as Erf 1981 Kuruman (-27.460298, 23.416192). The N14 straddles the site creating two portions (located on the norther and southern portion along the N14. The norther part may be accessible on Duiker Road and the southern portion located south is easily accessible along the N14.

The erf is currently zoned as "Agriculture" and is estimated to measure ±125,425 Ha in extent.

5. SPECIFICATION OF THE WORKS REQUIRED

The appointment of service provider for dolomite stability study (phase 1) for Erf 1981 Kuruman, in Ga-Segonyana local municipality, Northern Cape Province. The investigator shall document and report all findings and determinations in a written report that:

- Provides a description of the site and defines its extent and boundaries.
- Describes the investigation carried out and presents the results thereof in detail;
- Establishes the nature, fluctuations and compartmentalization of groundwater, and original groundwater levels from geohydrological data;
- Assesses the effect of changes to the groundwater level;
- Determines the inherent hazard class of the site or of the various portions thereof;
- Determines the dolomite area designation and appropriateness of proposed land usage in accordance with the requirements of SANS 1936-1;
- Provides the information needed for identification of the precautionary measures required in accordance with SANS 1936-3, and the risk management strategies required in accordance with SANS 1936-4; and
- Identifies any outstanding information to be determined or confirmatory investigation to be undertaken during the design-level investigation, particularly in respect of verifying or refining the inherent hazard class of the site or parts thereof.

Upon completion of the project, a completed report will be submitted to the **Council of Geoscience (CGS)** for comments and approval at the service provider's cost.
